

WHITENING MENU

After Care

- Avoid dark staining drinks like Tea, Coffee, Red Wine, etc. for 48 hours after whitening.
- We will apply Super Seal, a clear coating, to help protect your teeth against sensitivity.
- Brush your teeth with a sensitive or whitening toothpaste. Ask us at the front desk for more options.
- Sensitivity and hypersalivation are the two most common and temporary side effects.
- Vitamin E oil may be applied to sensitive gums after whitening.

In Office professional whitening consists of an hour visit where a chemically activated whitening treatment is applied by our staff to provide a bright white smile immediately.

In Office

- Professionally Applied Treatment via a One Hour Appointment
- Provides dramatic results within 48 hours of application
- All of the convenience of the at home trays in one visit
- Chemically activated, so no hot and uncomfortable light is needed

Purchase and take our professional grade whitening trays home for a quick and simple solution. Wear the trays while getting ready in the morning for a week to achieve that white, fresh smile.

At Home

- Ready to use right out of the box; no appointment necessary
- Wear 15 minutes per day for 5 to 10 days
- Professional strength whitening gel
- Discreet, clear tray material

For patients that regularly whiten their teeth and prefer the brightest smile possible. Custom trays can be matched to varying strengths of whitening gel and worn over night for the perfect shade of white.

Custom Trays

- Impressions of your mouth used to make custom trays
- Before and After photos to show whitening progress
- Refill syringes available for long-term care
- Exact fit for all teeth and sizes
